SEPTEMBER 2011

HIGHLIGHTS

Settle in for Summer's End

Soak up the last days of the season, because fall arrives later this month.

A Figure of Speech

Phrase: Salad days.

Meaning: A time of youthful inexperience.

Origin: In Shakespeare's "Antony and Cleopatra," Cleopatra reflects on her "salad days," when she was "green in judgment; cold in blood." Salads are green, and "green" in this usage means lacking knowledge and sophistication.

Flummoxed by Floss?

Choosing among all the varieties of dental floss—waxed, unwaxed, flavored, tape—can be confusing. Janet Kinney, assistant clinical professor of periodontics and oral medicine at the University of Michigan in Ann Arbor, says it's a matter of personal preference. Waxed floss may glide more easily between teeth, and fine floss may work better for those whose teeth are very close together. Still unsure? Ask your dental hygienist, Kinney says.

Positive Thought

"Once you replace negative thoughts with positive ones, you'll start having positive results." —Willie Nelson

Bumper Sticker Snicker

Everyone says I'm in denial, but really, I'm not.
